

• Introduction

Thank you for purchasing the Desktop 19" Rackmount Kit. Like any Waldorf product, this Kit has been developed and produced with love from Germany. We sincerely hope it will bring you fun and musical inspiration.

• Installation

Turn your synthesizer around onto a soft pad and place it onto your desk. Insert a flat screwdriver carefully into the recess and bend the screwdriver slightly towards the wooden side parts (Fig1). The wooden side parts should detach from the metal housing. Use your fingers for pulling off the side panel from the metal housing. Perform the same with the other wooden side panel.

Hint: The wooden side parts are fasten with Velcro tape. After removing the parts, you can insert the wooden side parts any time.

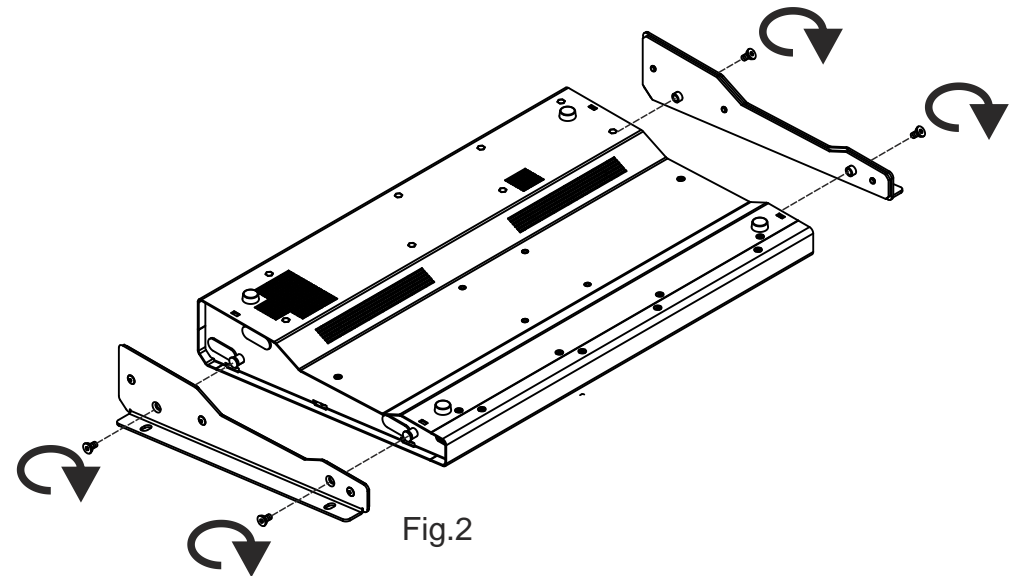

Fig.2

After both wooden side panels are removed, mount the rack ears to the metal housing by using the provided 4 x-screws. Now your synthesizer is ready for built into your 19" rack.

Have fun!

Your Waldorf Music team.
