Blofeld Plugin

Update 1.1.0 - changes to 1.0.0

P.S. these are the changes (also found in the README text in the installer):

- New feature: Send preset selected in list to HW
    - Currently, always writing to edit buffer (no bank slot)
    - For Multi, sends Multi settings and 16 parts to edit buffer

- New feature: Import Multi presets from HW
    - Via HW dialog: Import All Singles or Multis
    - Load current sound also supporting Multi presets
    - Dump Multi and Dump Arrangement from HW accepted
    - Dump All Multis when triggered from HW not fully supported

- Bugfixes
- VST3: unresponsive / white window start-up bug with some DAWs fixed
- VST3: Start-up crash on Reason DAW fixed
- Start-up delay of plug-in reduced
- Loading of Multi parameters from BPZ files and database fixed
- Automap samples
- Samples now keep pitch when project sample rate is changed
- Fixed crash when importing user wavetables with less than 64 samples
- ARP parameter display and editing for Multi part mode fixed
- ARP display update on part change fixed
- Normal/hold modes on ARP screen were swapped, fixed
- Preset list visual is updated after factory reset
- LFO speed value shown correctly after clocked mode change
- Mono mode with fixed velocity re-trigger fix
- LFO sync fix when changing speed while playing
- Clicks in Mono mode fixed
- Parameter changes are now sent to any Blofeld HW MIDI device ID
- Many UI spelling / wording fixes
