

Blofeld Plugin Version Information

Changes in Version 1.1.1

- User Wavetable (UWT) improvements
 - Mipmap support
 - Support full 16 characters name length
- Better compatibility with Blofeld HW
 - Matching UWT indexing
 - Switching between Sample and Wavetable OSC mode
 - Fixed OSC type sometimes being set to Sample when importing importing presets with UWTs
- Sample Support
 - Apply master volume on sample preview
 - Preset playing sound is not overridden (muted) any more when a sample preview is played
 - Fixed loading of presets with samples
- Bass Boost and EQ now being applied to all part outputs
- Clocked delay delay lenght now calculated based on host tempo, not fixed
- Better horizontal/vertical slider UI handling
 - Values display on mouse hovering
 - Type-in value editing
- Preset Manager
 - Sort author, group, and tag lists alphabetically
 - Deselect "select all" when a selection gets unchecked
 - Option to disable (and re-enable) the safety dialogs for deleting presets and abandoning a modified preset
 - Enabling multi mode for a preset, right-click assigning single presets to multi parts is immediately available without saving the preset
 - Newly added tags now immediately appear in the tag list
- Fixes for bugs occurring with Logic Pro
 - Prevent default initializing MIDI CC messages from being processed by the regular Blofeld CC mapping
- Fixes for bugs occurring with FL Studio
 - Correct ARP timing
 - Master Volume now working
- Fixed crash sometimes occuring when opening the sample edit page
- File overwrite warning when exporting presets
- Smaller bug fixes and improvements that came with the above
